

Overview

PROSYS Financial

Prosys provides a financial module that enables powerful financial analysis to help you improve profitability, increase working capital and cash flow, ensure more effective cost controls, and gain greater insight into business drivers when planning and forecasting.

PROSYS Financials is a corporate financial Management system that ensures effective management of financial transactions arising from dispersed physical locations with multiple currency transactions. Integration of all the information provides cross-functional and up-to-the-minute reports for quality decision-making.

It is designed to offer you a holistic view of your company's finance-related functions, including Tax Planning and Treasury Management.

PROSYS financial allow and register all financial transactions from other PROSYS ERP modules integrate together.
